Informasi Umum

Bagian-Bagian Soal

Pada tes AcEPT ada 5 Parts (bagian) yaitu:

Listening	----->	(20 soal)
Vocabulary	----->	(30 soal)
Grammar and Structure	---->	(40 soal)
Reading	----->	(40 soal)
Composing Skills	----->	(40 soal)

Bobot Soal

Bobot setiap butir soal adalah 2,5 (dua setengah) poin.

Jumlah soal AcEPT adalah 170 soal, sehingga $170 \times 2,5 = 425$.

Informasi resmi dari DAA, total nilai AcEPT adalah 426, selisih satu angka tentunya tidak signifikan meskipun mungkin ada alasannya.

Listening	----->	(50 poin)
Vocabulary	----->	(75 poin)
Grammar	----->	(100 poin)
Reading	----->	(100 poin)
Composing Skills	----->	(100 poin)

Nilai Terendah, Tertinggi dan Batas Lulus AcEPT

Pada sistem penilaian tes AcEPT kita ketahui bahwa:

- Nilai terendah : 0 (Setara dengan TOEFL 217)
- Nilai batas lulus S2 : 209 (Setara dengan TOEFL 450)
- Nilai batas lulus S3 : 268 (Setara dengan TOEFL 500)
- Nilai tertinggi : 426 (Setara dengan TOEFL 677)

Catatan:

Data tersebut adalah data resmi dari website UGM. Pada prakteknya banyak orang dengan nilai TOEFL 450 belum juga mencapai nilai AcEPT 209 dan orang dengan nilai TOEFL 500 belum mencapai AcEPT 268. Karena fakta dilapangan untuk mencapai nilai 209 perlu kemampuan setara TOEFL 500 dan untuk mencapai nilai AcEPT 268 perlu kemampuan setara TOEFL 550.

UNTUK LULUS ACCEPT HARUS BENAR BERAPA?

Untuk lulus, para mahasiswa dan calon mahasiswa pascasarjana UGM perlu bisa menjawab setidaknya sebagai berikut:

Mahasiswa S2 perlu nilai 209 minimal harus benar 84 soal

Mahasiswa S3 perlu nilai 268 minimal harus benar 108 soal

Demikianlah semoga informasi yang kami peroleh berbagai sumber ini bermanfaat bagi anda yang ingin bisa lulus tes AcEPT UGM.

Nilai Terendah, Tertinggi dan Batas Lulus AcEPT

Pada sistem penilaian tes AcEPT kita ketahui bahwa:

- Nilai terendah : 0 (Setara dengan TOEFL 217)

Listening 4,25 poin x 20 butir

KUPAS TUNTAS RAHASIA TES ACCEPT (PART 1: LISTENING COMPREHENSION).

1. Sebelum anda mendengarkan pernyataan dari tape recorder/suara narator, sebaiknya anda melihat terlebih dahulu jawaban/pilihan A,B,C,D pada lembar soal.
2. Bacalah sepintas lalu (scanning) setiap kalimat pada pilihan A,B,C,D.
3. Perhatikan secara seksama, ada beberapa kata dari setiap pilihan A,B,C,D yang tulisannya sama/dulang lebih dari satu kali.
4. Kata - kata yang diulang itu merupakan TOPIK PEMBICARAAN.
5. Arahkan/fokus pikiran anda pada topik itu.
6. Dengarkan pernyataan pada tape recorder/narator.
7. Ada kata/kelompok kata yg merupakan KATA KUNCI dari pernyataan narator.
8. Buatlah KESIMPULAN dari kata kunci itu/CARI KATA LAIN/PENRNYATAAN LAIN yg mempunyai makna yang mirip/sama dengan kata kunci itu.
9. Kesimpulan/kata lain/pernyataan lain/sinonim dari kata kunci itu merupakan jawaban yg benar.

Perhatikan contoh berikut: Anda akan mendengarkan pernyataan dari narrator/tape recorder sbb:

1. The assignment is due the day after tomorrow. No extension will be given for this.
- A. Simon is doing his job well, and they mentioned it.
B. You must do the assignment the day after tomorrow.
C. No sanction is given if you do the assignment the day after tomorrow.
D. It's better for you to complete the task right away.

Dari contoh di atas, dapat kita simpulkan bahwa topik dari pernyataan narrator adalah tentang ASSIGNMENT. Perhatikan kata assignment pada pilihan B dan C diulang dua kali.

KATA KUNCI pada pernyataan narrator adalah assignment (tugas), due (jatuh tempo) the day after

tomorrow, No extension (tdk ada perpanjangan waktu).

Maka pilihan yang paling tepat adalah (D) It's better for you to complete the task right away.

Alasannya, kata "assignment" (tugas) pada pernyataan narrator mempunyai makna yg sama dengan "task" (tugas) pada pilihan (D). Selain itu, kelompok kata "due the day after tomorrow" dan "No extension" dapat kita simpulkan dgn pernyataan lain yakni "It's better for you to complete the task right away" (sebaiknya dikerjakan sekarang).

Tips ini berlaku untuk Tes AcEPT Part 1 Listening Comprehension (NOMOR 1 - 10). Mudah - mudahan tips saya ini dapat bermanfaat bagi teman - teman semua. Tips yang lain akan saya bahas dilain kesempatan. Salam Sukses

Vocabulary 2,83 poin x 30 butir

TIPS FOR VOCABULARY - CLOZE TEST (AcEPT UGM)

Vocabulary cloze tests are common on all exams. They usually require you to choose the correct choice out of four possibilities.

1. Read the text through trying to understanding the general meaning.
2. Look at each missing word gap and try to imagine the correct should be.
3. Decide which part of speech (adjective, noun, gerund, etc.) needs to be used to fill each gap.
4. Read the text again, trying to fill gap as you come to it by imagining what the correct answer should be.
5. Read the text another time, this time choose the correct answer from the four (sometimes three) answers given.
6. If you are unsure of any given answer, try reading the sentence with each of the four possibilities.
7. Try to eliminate two of the obvious false answers

(usually two relatively false answers are given) When stuck between two answers, go with the one that sounds right.

Soal No 1 (8 may) 1-15

A. For questions 1 – 15, choose the word or phrase in A, B, C, or D which best completes each blank space in the text.

Text 1

The shark has senses specially (1)_____ the animal's life underwater. Smell is a shark's most acute sense. Approximately 70 percent of the shark's brain is used for smelling functions. Experiments have shown that sharks can detect prey (2)_____ by smell, and the hungrier the shark, the less stimulant needed to elicit a reaction.

Sharks are sensitive to light and can detect certain objects even in murky water. Some have a mirror-like layer under the retina that reflects incoming light and increases the (3)_____ light available to the eye.

Sharks can also sense electric and magnetic fields. Sensory pores located on the shark's head can detect a prey's bioelectric field (4)_____ if the prey is buried in sand. A shark can also detect the Earth's magnetic field. Open-ocean sharks may use this information to (5)_____ and orient themselves.

1. A. appointed by C. figured out
B. invented for D. designed for

2. A. timidly C. solely
B. hardly D. disorderly

3. A. prominence of C. odor of
B. disposal of D. amount of

4. A. even C. however
B. as D. even though

5. A. sink C. crawl
B. navigate D. Thrust

Soal 1

(JUMLED SENTENCE) 34-40

1. Thorough chewing cuts food into small pieces that are more easily attacked by the saliva, which moistens the food so it can be swallowed easily.
2. Digestion begins in the mouth, where the food is

cut and chopped by the teeth.

3. From the mouth the food is swallowed into the tubelike esophagus, or gullet.
4. The saliva also contains the enzyme amylase, which changes some starches into simple sugars .
5. The tongue helps mix the food particles with a digestive juice called saliva, which is secreted by glands in the mouth.

- A. 2-3-1-4-5
- B. 2-5-4-3-1
- C. 2-5-1-4-3
- D. 2-3-5-1-4

Jawaban Soal No1 :

Soal 2

(JUMLED SENTENCE) 34-40

1. He comes from Yogyakarta.
2. His study program is Management.
3. His complete name is Bang Acept.
4. He studies at Gadjah Mada University.

- A. 2 - 4 - 1 - 3
- B. 3 - 1 - 4 - 2
- C. 3 - 4 - 1 - 2
- D. 1 - 3 - 2 - 4

TIPS:

Langkah 1: Perhatikan 4 kalimat di atas yg disusun secara acak (bkn susunan yg benar).

Langkah 2: Perhatikan hubungan antara kalimat yg satu dgn yg lainnya (kalimat manakah yg hrs diurutkan pertama, kedua, ketiga dan ke empat).

Langkah 3: Jika anda tdk dpt mengurutkan secara langsung dari 4 kalimat tsb, anda bs melihat kalimat 1 (pertama) dan kalimat lain manakah yg merupakan kelanjutan dari kalimat 1 atau sebelum kalimat 1.

Misalnya: Kalimat pertama merupakan kelanjutan dari kalimat ketiga atau kalimat ketiga hrs ditempatkan sebelum kalimat pertama. Sehingga dpt kita simpulkan bahwa kalimat ke 3 dan 1 merupakan urutan logis.

Langkah 4: Perhatikan pada pilihan (A,B,C dan D), apakah ada pilhan urutan 3 - 1? Jika pilihan lain tdk ada urutan 3 - 1

Jika ada pilihan lain yg mengurutkan 3 - 1, maka anda dapat menganalisa lg kalimat manakah yg merupakan kelanjutan dr kalimat 1. Atau kalimat manakah yg hrs diurutkan paling akhir.

Jawaban Soal No 2 : B. (3 - 1 - 4 - 2)

Soal No 3 (4 april)

- 1) These small land percentage are consisting of Bunaken, Manado Tua, Mantehage and Siladen islands.
- (2) The park is a representative of Indonesia tropical water ecosystem.
- (3) Established in 1991, the park covers the area of 890,65 km²,
- (4) The Bunaken national Park is a marine park in the north of Sulawesi.
- (5) 97 % of which is marine habitat while the 3 % others are consisting of islands.

The right order is

- A. 4-3-5-2-1 c. 4-2-3-5 -1
- B. 4-5-3-1-2 d. 4-1-5-3-2
- C. 4-2-3-5-1

Jawaban Soal No 3 : C. 4-2-3-5-1

Soal No 4 (4 april)

A. In this section of the test, you are required to demonstrate your ability to paraphrase sentences and to recognize language that is not appropriate for standard written English. There are five parts to this section, with special direction for each part.

A. Numbers 1 – 10 contain complete and correct sentences. For each number, you are required to choose the most appropriate paraphrased sentence closest in meaning to the original one.

1. There are probably more than 10 billion trees under cultivation on the coffee plantations of the world.

- A. More than 10 billion people cultivated coffee in plantation around the world
- B. May be more than 10 billion trees are cultivated on the coffee plantations in the world.
- C. More than 10 billion coffee trees in the world are planted under supervision.

Soal No 8 (10 januari)

Arrange these sentences into a good paragraph!

- 1. These violent storms are often a hundred miles in diameter, and their wind can reach velocities of seventy-five miles per hour or more.
- 2. The energy that is released by a hurricane in one day exceeds the total energy consumed by the humankind through out the world in one year
- 3. Hurricanes exert tremendous power
- 4. Furthermore, the strong wind and heavy rain fall that accompany them can completely destroy a small town in a couple of hours.
- 5. They can also be called cyclones.

- a. 1 – 2 – 3 – 4 – 5
- b. 3 – 5 – 1 – 4 – 2
- c. 3 – 5 – 1 – 2 – 4
- d. 5 – 4 – 3 – 2 – 1

Jawaban Soal No 8 :

Soal No 9

- A. On Monday the secretary of state is due to hold a day of meetings with high-level political, military and business figures to further a "strategic dialogue" aimed at further expansion of US trade in India.
- B. US secretary of state Hillary Clinton arrived in India on Sunday for strategic talks aimed at bolstering bilateral ties and securing firmer support for the war in Afghanistan.
- C. Clinton arrived by plane in Delhi before noon, according to a reporter travelling with her, ahead of expected talks with Prime Minister Manmohan Singh and President Pratibha Patel in the evening.

- 1. BAC
- 2. BCA
- 3. CBA
- 4. CAB

Soal No 10.

37. (1) The energy that is released by a hurricane in one day exceeds the total energy consumed by human kind throughout the world.
 (2) These violent storms are often a hundred miles in diameter, and their winds can reach velocities of 75 miles per hour or more.
 (3) Hurricanes, which are also called cyclones, exert tremendous power..
 (4) Furthermore, the strong winds and heavy rainfall that accompany them can completely destroy a small town in a couple of hours.
- A. 1-2-4-3
 B. 3-1-2-4
 C. 2-3-4-1
 D. 3-2-4-1

- 1) That energy that is released by hurricane in one day exceeds the total energy consumed by human kind throughout the world
- 2) These violent storms are often a hundred miles in diameter, and their winds can reach velocities of 75 miles per hour or more
- 3) Hurricanes, which are also called cyclones, exert tremendous power
- 4) Furthermore, the strong winds and heavy rainfall that accompany them completely destroy small town in a couple of hours

Soal No 11

Numbers 31 – 36 contain jumbled sentences. One of the sentences has been underlined. You are required to choose the next sentence which logically follows the underlined one.

10. 1. If an object held near the surface of the earth is released, it will fall and accelerate, or pick up speed, as it descends.

2. The weight of an object is equal to the mass of the object multiplied by the acceleration due to gravity.
3. The force of gravity on an object is also called the object's weight.
4. This acceleration is caused by gravity, the force of attraction between the object and the earth.
5. This force depends on the object's mass, or the amount of matter in the object.

- A. 2
 B. 3
 C. 4
 D. 5

11. 1. Internet is composed of many interconnected computer networks.

2. Instead, an individual who has Internet access can communicate directly with anyone else on the Internet, post information for general consumption or retrieve information.

3. Each network may link tens, hundreds, or even thousands of computers, enabling them to share information and processing power.

4. The Internet has made it possible for people all over the world to communicate with one another effectively and inexpensively.

5. Unlike traditional broadcasting media, such as radio and television, the Internet does not have a centralized distribution system.

- A. 2
 B. 3
 C. 4
 D. 5

12. 1. Pregnancy starts when a male's sperm fertilizes a female's ovum, and the fertilized ovum implants in the lining of the uterus.

2. By the 12th week of pregnancy many of these symptoms have subsided, but others appear.

3. Some women also experience cravings for unusual substances such as ice, clay, or cornstarch; this condition, called pica, can indicate a dietary deficiency in iron or other nutrients.

4. Other symptoms include breast tenderness and swelling, fatigue, nausea or sensitivity to smells, increased frequency of urination, mood swings, and weight gain.

5. Because pregnancy changes a woman's normal hormone patterns, one of the first signs of pregnancy is a missed menstrual period.

- A. 2
 B. 3
 C. 4
 D. 5

Soal No 1 (27 may)

The planet Mars has always captured the human imagination. There is its redness. We know now that the color comes from chemical reactions that long ago locked up Mars's oxygen in reddish minerals on its surface, causing the "rusting" of the planet. To the ancient people, the red color meant only one thing: blood. From the earliest times, Mars has been associated with bloodshed. Even the astronomical symbol for Mars, a circle with an arrow pointing at 2 o'clock, is supposed to represent a shield and a spears.

As astronomers used telescopes, Mars mythology grew. It was the Italian astronomer Giovanni Schiaparelli who, in 1877, produced the most lasting bit of Martian folklore. He saw what he took to be long, thin, unnaturally straight lines on the Martian surface. He called them canali, a word that can translate into English either as "channels" or "canals." Unfortunately, the latter translation was used, and the canals of Mars were born. Of course, if there were canals, there had to be canal builders, so once more Mars was peopled with all manner of intelligent life forms!

In 1965 Mariner 4 sent back first close-up pictures of the Martian surface. Not only were there no canals, but Mariner 4 and the spacecraft that followed revealed a planet that was a cratered, lifeless desert. We have subsequently learned that Mars is home to Olympus Mons, the largest volcano in the entire solar system, and to a canyon system stretching for almost 3,000 miles around the Martian equator. The atmosphere is extremely thin (equivalent to that at 130,000 feet above Earth) and made up almost entirely of carbon dioxide. The surface is cold, almost never getting above freezing even at the summertime equator.

Perhaps the greatest surprise were the photographs from Mariner 9 in 1971 and 1972 that showed channels on the surface. Now these were not Schiaparelli's canali there's, no way these channels could be seen by even the most powerful earthbound telescope. They are unmistakable water courses, however. There is no water in them now, but they trace out the path of water that flowed in the past. They are like the dry river of the American West, through which water from rain flows, but which are

dry most of the time. Water once ran on the surface of Mars.

New explorations on Mars by the spacecraft Pathfinder, due to arrive on the planet's surface in 1997, are planned to give scientists more information about possible past life on Mars. One of Pathfinder's missions will be to lay the foundation for future efforts to find fossil remains of living things. The landing site for the Mars Pathfinder is going to be the mouth of a flood channel called Ares Vallis.

1. It can be inferred from the passage that myths about Mars

- (A) are widely believed today
- (B) have been dispelled by current space exploration
- (C) are based on scientific facts
- (D) depict it as a lifeless planet

2. Which of the following have NOT been a source of information about Mars?

- (A) Spacecraft
- (B) Telescopes
- (C) Conjecture
- (D) Astronauts

3. The phrase "the latter" in line 21 refers to

- (A) canals
- (B) canali
- (C) channels
- (D) unusual straight lines

4. Where in the passage does the author give information about the topography of Mars?

- (A) Lines 2-6
- (B) Lines 26-32
- (C) Lines 38-46
- (D) Lines 58-62

5. The word "powerful" in line 46 is closest in meaning to

- (A) expensive
- (B) dominant
- (C) influential
- (D) strong

6. According to the passage, the redness of Mars is a result of

- (A) a chemical reaction on the planet surface
- (B) the old age of the planet
- (C) the reflection of the Sun
- (D) an abundance of oxygen in the planet's atmosphere

7. Why do scientists think that the channels of Mars were waterways?

- (A) Bones have been found there.
- (B) They still have a little water in them.
- (C) They resemble a similar system on Earth.
- (D) They are straight and narrow.

8. According to the passage, Pathfinder's mission to Mars includes

- (A) preparing for future fossil-finding expeditions
- (B) placing specialized equipment on the planet's surface
- (C) checking for flood damage
- (D) bringing back fossils for further study

The Big Bang Theory

Most astronomers believe the Universe began in a Big Bang about 14 billion years ago. At that time, the entire Universe was inside a bubble that was thousands of times smaller than a pinhead. It was hotter and denser than anything we can imagine.

Then it suddenly exploded. The Universe that we know was born. Time, space and matter all began with the Big Bang. In a fraction of a second, the Universe grew from smaller than a single atom to bigger than a galaxy. And it kept on growing at a fantastic rate. It is still expanding today.

As the Universe expanded and cooled, energy changed into particles of matter and antimatter. These two opposite types of particles largely destroyed each other. But some matter survived. More stable particles called protons and neutrons started to form when the Universe was one second old.

Over the next three minutes, the temperature

dropped below 1 billion degrees Celsius. It was now cool enough for the protons and neutrons to come together, forming hydrogen and helium nuclei.

After 300 000 years, the Universe had cooled to about 3000 degrees. Atomic nuclei could finally capture electrons to form atoms. The Universe filled with clouds of hydrogen and helium gas.

1. Evidence indicates that galaxies are

- A. stationary
- B. moving away from each other
- C. moving towards each other
- D. always changing direction

2. The Big Bang theory

- A. is now an accepted fact
- B. states that galaxies make a loud sound when they collide
- C. states that the universe began with an event
- D. does not yet have evidence to support it

3. If a star is moving toward you,

- A. its wavelengths become compressed
- B. its wavelengths get longer
- C. its wavelengths do not change
- D. its wavelengths cannot be accurately Measured

4. If a star is moving away from you,

- A. its wavelengths become compressed
- B. its wavelengths get longer
- C. its wavelengths do not change
- D. its wavelengths cannot be accurately measured

Reading Comprehension Text 1

A marketer can rarely satisfy everyone in a market. Not everyone likes the same soft drink, auto, mobile, college, and movie. Therefore, marketers start with market segmentation. They identify and profile distinct groups of buyers who might prefer or require varying products and marketing mixers. Market segments can be identified by examining demographics, psychographics, and behavioral among buyers. The firm decides which segments presents the greatest opportunity those whose needs the firm can meet in a superior fashion for each chosen target market, the firm develops a market offering. The offering is, for example, values developed his car for the target market of buyers for whom safest a costumers can buy.

Traditionally, a "market" was a physical place where buyers and sellers gathered to exchange goods. How marketers view the sellers as the industry and communications (ads, direct mail, email messages) to the market : in return they receive money and information (attitudes < sales data).

A global industry is one in which the strategic positions of competitors in major geographic or national markets are fundamentally affected by their overall global position. Global firms both large and

small plan, operate and coordinate their activities and exchanges on a world wide basis.

Today we can distinguish between a market plan and a market space. The shopping in store ; market space is digital, E-commerce business transactions conducted online has many advantages for both consumers and business, including, convenience, savings, selection, personalization, and information for example, online shopping is so convergent that 30 percent, of the order generated by the web site of REI, a recreational keeping its stores often late or hiring costumers service representatives. However costumers for lower prices and is threding intermediars such as travel agents, stockbokers, insurance agents, and traditional retailer .To succeed in the on line market space marketers will need to reorganize and redefine themselves

Question :

1. What is the author primarily concerned with ?
2. The word they in line 10 refers to
3. It can be inferred from the text that the purpose of the market segmentation is
4. The word " psychographic" in line 10 might include the following items, except
5. Which of the following is true ?
6. The pronoun "one" in line 33 refers to
7. The word " sparing" in line 55 is closest in meaning to
8. The author gives an example of on line shopping in the text to show
9. Where in the text does the author mention gives the modern definition on the market . . .
10. Where in the text does the author mention the benefit of on-line transaction ?

Soal no 5 (16 januari)

The pioneers of the teaching of science imagined that its introduction into education would remove the conventionality, artificiality, and backward lookingness which were characteristic of classical studies, but they were gravely disappointed. So, too, in 5 their time had the humanists thought that the study of the classical authors in the original would banish at once the dull pedantry and superstition of mediaeval scholasticism.

The professional schoolmaster was a match for both of them, and has almost managed to make the understanding of chemical reactions as dull 10 and as dogmatic an affair as the reading of Virgil's Aeneid. The chief claim for the use of science in education is that it teaches a child something about the actual universe in which he is living, in making him acquainted with the results of scientific 15 discovery, and at the same time teaches him how to think logically and inductively by studying scientific method. A certain limited success has been reached in the first of these aims, but practically none at all in the second.

Those privileged members of the community who have been through a secondary or public school 20 education may be expected to know something about the elementary physics and chemistry of a hundred years ago, but they probably know hardly more than any bright boy can pick up from an interest in wireless or scientific hobbies out of school hours. As to the learning of scientific method, the whole thing is palpably 25 a farce. Actually, for the convenience of teachers and the requirements of the examination system, it is necessary that the pupils not only do not learn scientific method but learn precisely the reverse, that is, to believe exactly what they are told and to reproduce it when asked, whether it seems nonsense to them or 30 not.

The way in which educated people respond to such quackeries as spiritualism or astrology, not to say more dangerous ones such as racial theories or

currency myths, shows that fifty years of education in the method of science in Britain or Germany has produced no visible effect whatever.

The only way of learning the 35 method of science is the long and bitter way of personal experience, and, until the educational or social systems are altered to make this possible, the best we can expect is the production of a minority of people who are able to acquire some of the techniques of science and a still smaller minority who are able to use and 40 develop them.

1. The author implies that the 'professional schoolmaster' (line 7) has
A. no interest in teaching science
B. thwarted attempts to enliven education
C. aided true learning
D. supported the humanists
E. been a pioneer in both science and humanities.

2. The author's attitude to secondary and public school education in the sciences is
A. ambivalent
B. neutral
C. supportive
D. satirical
E. contemptuous

3. The word 'palpably' (line 24) most nearly means
A. empirically
B. obviously
C. tentatively
D. markedly
E. ridiculously

4. The author blames all of the following for the failure to impart scientific method through the education system except
A. poor teaching
B. examination methods
C. lack of direct experience
D. the social and education systems
E. lack of interest on the part of students

5. If the author were to study current education in science to see how things have changed since he wrote the piece, he would probably be most

interested in the answer to which of the following questions?

- A. Do students know more about the world about them?
- B. Do students spend more time in laboratories?
- C. Can students apply their knowledge logically?
- D. Have textbooks improved?
- E. Do they respect their teachers?

6. Astrology (line 31) is mentioned as an example of

- A. a science that needs to be better understood
- B. a belief which no educated people hold
- C. something unsupportable to those who have absorbed the methods of science
- D. the gravest danger to society
- E. an acknowledged failure of science

7. All of the following can be inferred from the text except

- A. at the time of writing, not all children received a secondary school education
- B. the author finds chemical reactions interesting
- C. science teaching has imparted some knowledge of facts to some children
- D. the author believes that many teachers are authoritarian
- E. it is relatively easy to learn scientific method.
